RAP-S007-DBL

This adjustable 7 ft Rack stands out for its versatility, since it has a base that allows it to be adjusted to 3 different depth positions, providing different mounting possibilities depending on the depth of the equipment.

Construction & Material:

No.	Item	RAP-S007-DBL
1	Assembly Format	19" EIA/ECA-310E
2	Useful height	45U
3	External height	84"
4	Broad	20.5"
5	Loading capacity	850 Kg
6	Depth	14.0"
7	Stud Type	Threaded

HIGH-STRENGTH

Solid construction through the precise assembly of its high-strength bolts.

CABLE ORGANIZATION

Nylon hooks that allow cables to be carried in an organized manner from the external sides of the rack.

CABLE TRANSPORT

High resistance studs with 120mm depth with perforations that allow cable transport.

FIXING HOLE TO FLOOR

Base with perforations that offer the possibility of anchoring to the floor, to increase the stability of the structure.
