

PPF-361U-R

Provides a modular and flexible system for the management of Fiber Optic terminations, connections and patches for multiple Applications.

High capacity solution, which maximizes the utilization of rack space and reduces overhead system costs.

Construction & Material:

No.	Item	Specification
1	Rack Units	1U
2	Module Capacity	3 Ports
3	Quantity of Fibers	Up to 36
4	Mounting Type	Rackable on 19" Pars
5	Material	Cold Rolled Steel and Electrostatic Paint Finishes
6	Dimensions (HxWxDx)	1.73" x 16.92" x 8.42"
7	Module Installation	Compatible with modules of 110 mm between centers and 132 mm wide.

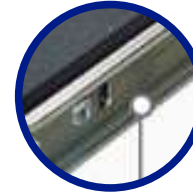

Compartment of splices and connection, inside tray providing protection and security optical connection system.

Press clamping system that allow a firm grip on the fiber cable to avoid detachments when handling the tray.

Half-moon fiber guides, which allow proper handling of fiber yarns, keeping the radii of curvature to avoid losses in the transfer.

Sliding system, which allow to remove the structure of the tray to allow access broad to the components of tray fixing and splicing
